

I claim:

1. An accessory for a bicycle having a top tube, comprising:

an inflatable plastic member in the shape of a motorcycle fuel tank, said inflatable plastic member having a bottom; and

means for attaching said inflatable plastic member to said top tube of said bicycle, said means disposed on said bottom of said inflatable plastic member, said inflatable plastic member simulating a motorcycle fuel tank.
2. The accessory of Claim 1 wherein said means for attaching said inflatable plastic member to said top tube further includes a top tube receipt channel defined in said bottom of said inflatable plastic member for receipt of said top tube therein.
3. The accessory of Claim 2 wherein said means for attaching said inflatable plastic member to said top tube of said bicycle further includes first and second attachment members positioned on either side of said top tube receipt channel for engagement to one another when said top tube is positioned in said top tube receipt channel.
4. The accessory of Claim 3 wherein said inflatable plastic member can be formed in a variety of shapes selected to simulate one of a variety of actual motorcycle fuel tanks.
5. The accessory of Claim 4 further including a simulated filler cap positioned on said inflatable plastic member.
